

CodePath Learning

Complete Course Syllabus Pack

Professional syllabus pack for launch batch, student sharing and course presentation.

Web Development - 6 Weeks

1. Computer basics and coding setup
2. VS Code and Live Server
3. HTML website structure
4. Text, image, links and lists
5. Forms and tables
6. CSS colors, fonts and spacing
7. Box model and layout
8. Flexbox basics
9. Responsive design
10. JavaScript basics
11. DOM and events
12. Form validation
13. GitHub project upload
14. Portfolio mini project

Python Programming - 6 Weeks

1. Python setup and introduction
2. Variables and data types
3. Input and output
4. Operators
5. If-else conditions
6. Loops
7. Lists and tuples
8. Dictionary basics
9. Functions
10. String handling
11. File handling basics
12. Error handling basics
13. Simple logic building
14. Marks calculator project
15. Mini automation project

C Programming - 6 Weeks

1. C language introduction
2. Compiler and setup
3. Variables and data types
4. Input and output
5. Operators
6. If-else statements
7. Loops
8. Pattern programs
9. Arrays
10. Strings
11. Functions
12. Pointers basics
13. Structure basics
14. Menu-driven program
15. College exam practice programs

MySQL Database - 4 Weeks

1. Database introduction
2. DBMS vs RDBMS
3. Tables, rows and columns
4. Data types
5. Create database and table
6. Insert, update and delete data
7. SELECT queries
8. WHERE, ORDER BY, LIMIT
9. Aggregate functions
10. Primary key and foreign key
11. JOIN basics
12. Simple database design
13. Student registration database project

Vibe Coding with AI - 2 Weeks Add-on

1. What is vibe coding?
2. AI tools introduction
3. Prompt writing basics
4. How to ask AI for code
5. Generate website layout
6. Generate HTML/CSS/JS code
7. Debug errors with AI
8. Improve UI with AI
9. Understand AI-generated code
10. AI-assisted mini project
11. Safe and correct AI usage

AI Tools for Smart Projects - 2 Weeks Add-on

1. ChatGPT for project ideas
2. AI for notes and explanation
3. AI for website planning
4. AI for UI/UX ideas
5. AI for debugging
6. AI for documentation
7. AI for resume/project description
8. AI for presentation making
9. AI for interview preparation
10. Safe AI usage rules

Note: This syllabus is for private skill-based learning and practical coding training by CodePath Learning.
